Porto Alegre, Rio Grande do Sul, Brazil | Remote International Contractor

PROFESSIONAL SUMMARY

Backend Developer with 4+ years of professional experience building backend services and distributed systems while collaborating remotely with U.S.-based product teams. Specialized in Java and Spring Boot, with hands-on experience in Go, microservices, REST and gRPC APIs, event-driven systems, Redis and Caffeine caching, PostgreSQL, GCP, CI/CD, and production observability. Experienced in financial and cryptocurrency platforms involving digital wallets, accounts, market data, and compliance workflows.

EXPERIENCE

- **Ambush** February 2023 - Present
Backend Developer Austin, Texas, USA (Remote)
 - **U.S. Cryptocurrency and Financial Platform (Jun 2024 - Present):** Build and maintain Java and Spring Boot microservices for digital wallets, customer accounts, asset and market data, and compliance workflows.
 - Design and evolve REST and gRPC/Protobuf contracts, OpenAPI specifications, BFFs, and integration services using a documentation-first approach.
 - Deliver wallet balances, deposits, withdrawals, asset overviews, market pricing, portfolio calculations, and customer-support workflows.
 - Implement local and distributed caching with Caffeine and Redis, plus batch-remediation flows with validation, failure logging, and per-item error isolation.
 - Improve reliability with JUnit, Maven, GitHub Actions CI/CD, logs, Grafana, Elasticsearch, distributed tracing, and root-cause analysis.
 - **Internal HR Platform (Feb 2023 - Jun 2024):** Developed Go backend services for candidate and employee profiles, technical-skills filtering, and interview-scheduling workflows backed by PostgreSQL.
 - Integrated GCP Pub/Sub for asynchronous service-to-service communication and event-driven workflows.
- **Porto Alegre City Hall** December 2022 - February 2023
Technical Support Intern Porto Alegre, Brazil
 - Provided user support and helped maintain internal systems and equipment in a public-sector environment.

EDUCATION

- **Pontifical Catholic University of Rio Grande do Sul (PUCRS)** March 2022 - December 2026
Bachelor's Degree in Computer Science Porto Alegre, Brazil

PROJECTS

- **Office Timesheet: Team Hour-Tracking Platform** 2025
Node.js, Express, React, Vite, PostgreSQL, Docker, Fly.io [GitHub](#)
 - Built a role-based time-tracking platform with a Node.js/Express REST API, React/Vite frontend, PostgreSQL, JWT authentication, password recovery, and operational KPI dashboards.
 - Containerized the application with Docker and automated build and deployment workflows using GitHub Actions and Fly.io.

SKILLS

- **Programming Languages:** Java, Go (Golang), SQL, JavaScript, Node.js
- **Backend Engineering:** Spring Boot 3, Microservices, Distributed Systems, REST APIs, gRPC, Protobuf, OpenAPI, BFF, Batch Processing
- **Data & Messaging:** PostgreSQL, MongoDB, Redis, Caffeine, GCP Pub/Sub, Event-Driven Architecture
- **Quality & Operations:** Docker, Maven, GitHub Actions, CI/CD, JUnit, Grafana, Elasticsearch, Distributed Tracing, Root-Cause Analysis

ADDITIONAL INFORMATION

- **Languages:** Portuguese (Native), English (Advanced Professional)
- **Interests:** Backend Engineering, Distributed Systems, Microservices, Cloud Computing
